Note: Computer classes for children are informal when the tuition is going on. Actual classes no longer take place from October, though some children still use the computers under supervision and with help from Vijay and Ankush. The Tuition class attendance therefore takes the place of the computer class data provided in the interim report.

The disparity between the number of boys to girls taking advantage of these tuition classes in both class ranges is concerning but it is very difficult to convince parents to allow the girls to join.
